To whom it may concern:

Zavala Corporation recently performed Division 2 and Division 3 concrete work for Andersen Construction on our SoloPower project on NW Marine Drive in Portland, Oregon. Their work consisted primarily of constructing new footings, trenches, in-fills, pads and slabs for a new solar panel production facility in an existing building. Work extended to the exterior and included more slabs, pads, containment areas, stair treads and bollard fills. The project schedule was very aggressive and unfortunately the incomplete plans were riddled with changes as work proceeded. Remarkably, Zavala Corporation was able to respond quickly to the projects ever changing needs. Their crews were professional and the quality of their work was excellent. I plan to continue using Zavala Corporation and would not hesitate to recommend them to others for similar projects.

Respectfully,
ANDERSEN CONSTRUCTION COMPANY
